Deleting Code at Nokia

Tom Coupland @tcoupland

#0254

What happened when we set out for simplicity

Tom Coupland @tcoupland

#0254

Nokia Entertainment Bristol

Self-Operating Napkin

54651

Self-Operating Napkin

Increased transparency Easier to reason about Can dive into the code Less magic

Simple configuration Faster boot time Does less

Gradle ?

Reduction in verbosity Scriptable Easier to reason

Reduction in verbosity Valid Java is valid Groovy Functional concepts

Immature at the time Lack of adoption drive Cost/Benefit didn't add up

Schema duplication Familiar query structure Reduction in mapping code Built in sharding support Similar write semantics

Stalked project Engaged large group Presented to department Devops style deployment

Scala

Both OO and FP paradigms Developer satisfaction Retains static types Information Density

Both OO and FP paradigms Complexity Covert adoption

Functiona Declarativ Immetable Dynamic Simple

Concise Sense of fun The Joy of Clojure Embodied in Land of Lisp

Local user-group Greenfield service Early knowledge sharing Brown bag meetings

What about Deleting Code?

How to escape

Think about what you want Educate yourself & those around you Local user groups Patience

How to move on

Break down your system Perform experiments Be inclusive Patience Be brave

Never make this mistake again?

Relax You're going to Prepare for it instead Time of 'The Stack' is over Break down your system Keep learning Have fun

Thank You #0254
