

# ICT4D

Merrick Schaefer, UNICEF  
Jeff Wishnie, ThoughtWorks

# Information and Communication Technology for Development

Application of communication and computing  
technology to the needs of the developing world:

## Poverty

## Health

## Education

## Relief

# ICT4D (Traditional)

Power

Connectivity

Cost/Access

# ICT4D (Traditional)

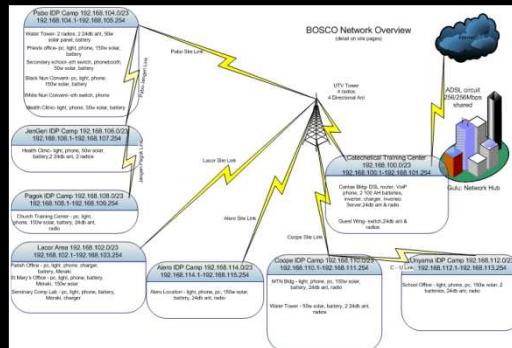

## Power

- Inveneo
- OLPC
- Green WiFi
- We Care Solar

## Connectivity

- AirJaldi
- BOSCO
- TIER

## Cost/Access

- QuestionBox
- Digital Doorway
- Village Telco

# Industry is now Driving Solutions

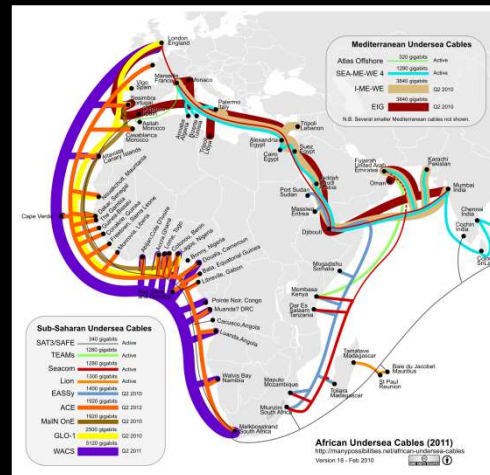

## Power

## Connectivity

## Cost/Access

What do you think of when you think of technology in the developing world?

The pace of technical change is so rapid in most of the world that all perceptions of technology need to be rethought.

# Consider:

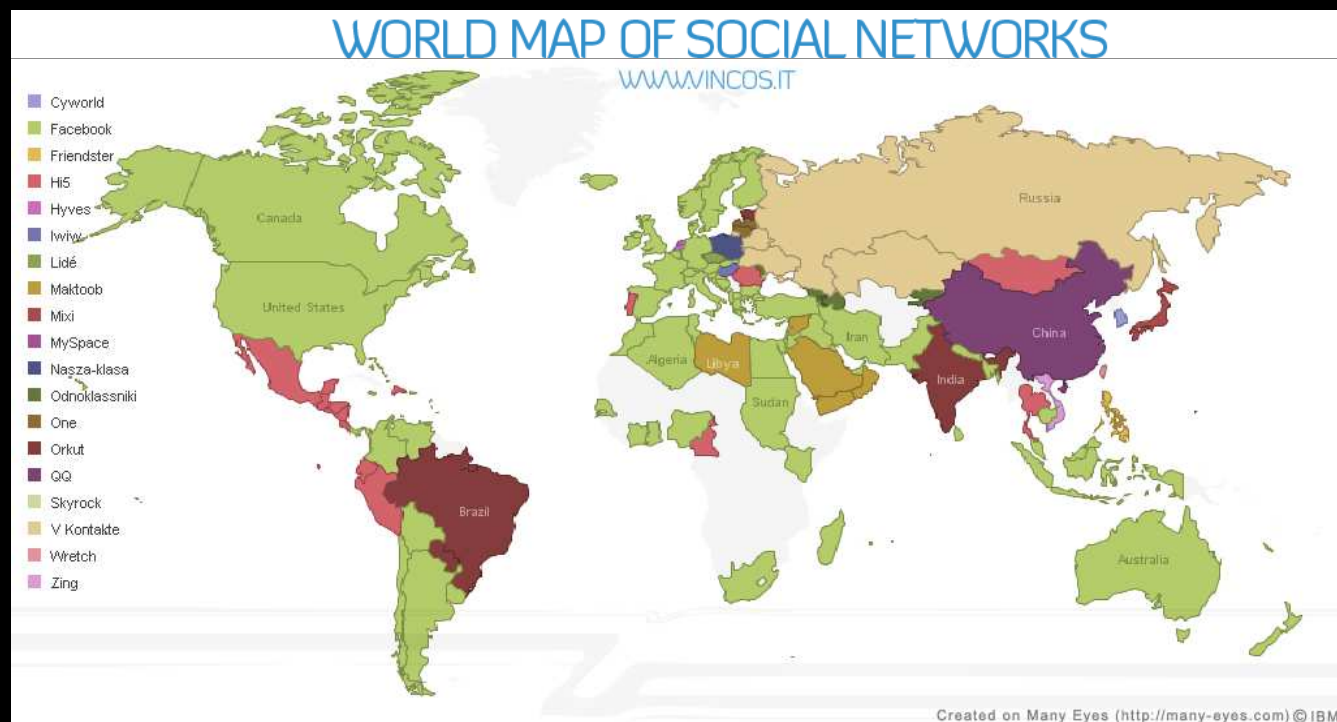

China now has the highest number of internet users globally. Over 100,000,000 more than the next highest, the USA.

Global Rank	Country	Number of Users
1	China	360,000,000
2	United States	227,719,000
3	Japan	95,979,000
4	India	81,000,000
5	Brazil	67,510,400

# Consider:

Social Networking is global phenomenon and growing faster in the developing world than the developed.

# Consider:

Both South Africa and Nigeria are in the top ten countries consuming the mobile web.

1. Russia
2. Indonesia
3. China
4. Ukraine
5. India
6. South Africa
7. USA
8. United Kingdom
9. Nigeria
10. Poland

# Consider:

The adoption of mobile phones has occurred at perhaps the fastest rate and to the deepest level of any consumer-level technology in history

## African Cell Phone Ownership Growth

1998

2 million phones

2010

500 million phones

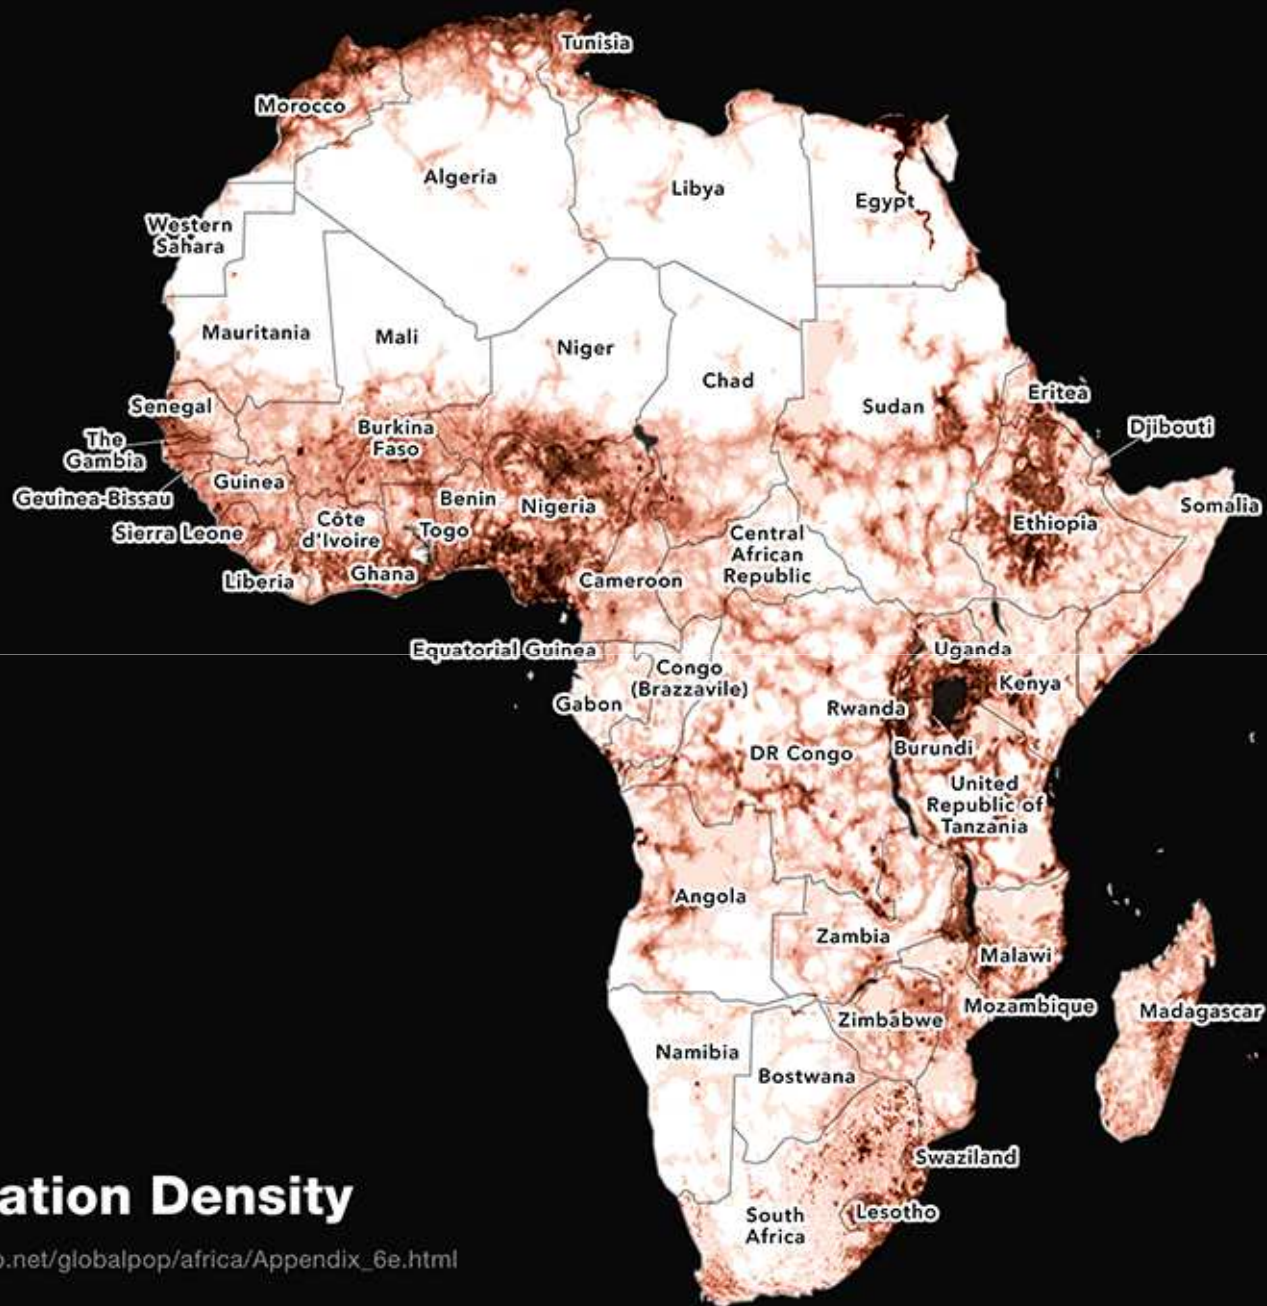

What is driving this growth?

What is limiting it?

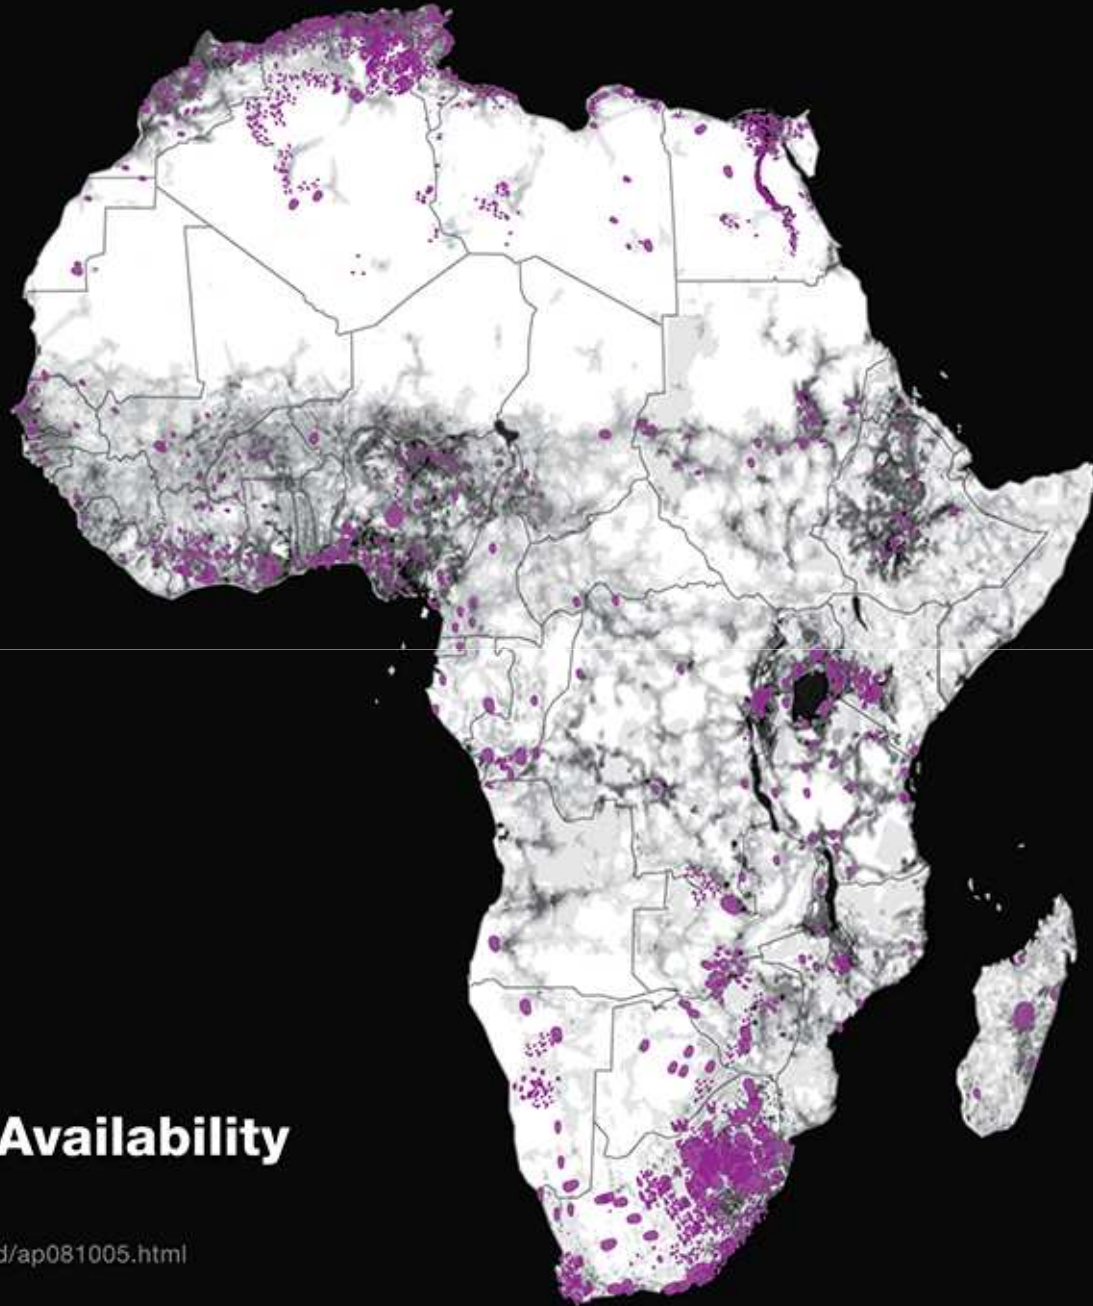

Let's look at Africa as an example:

## Population Density

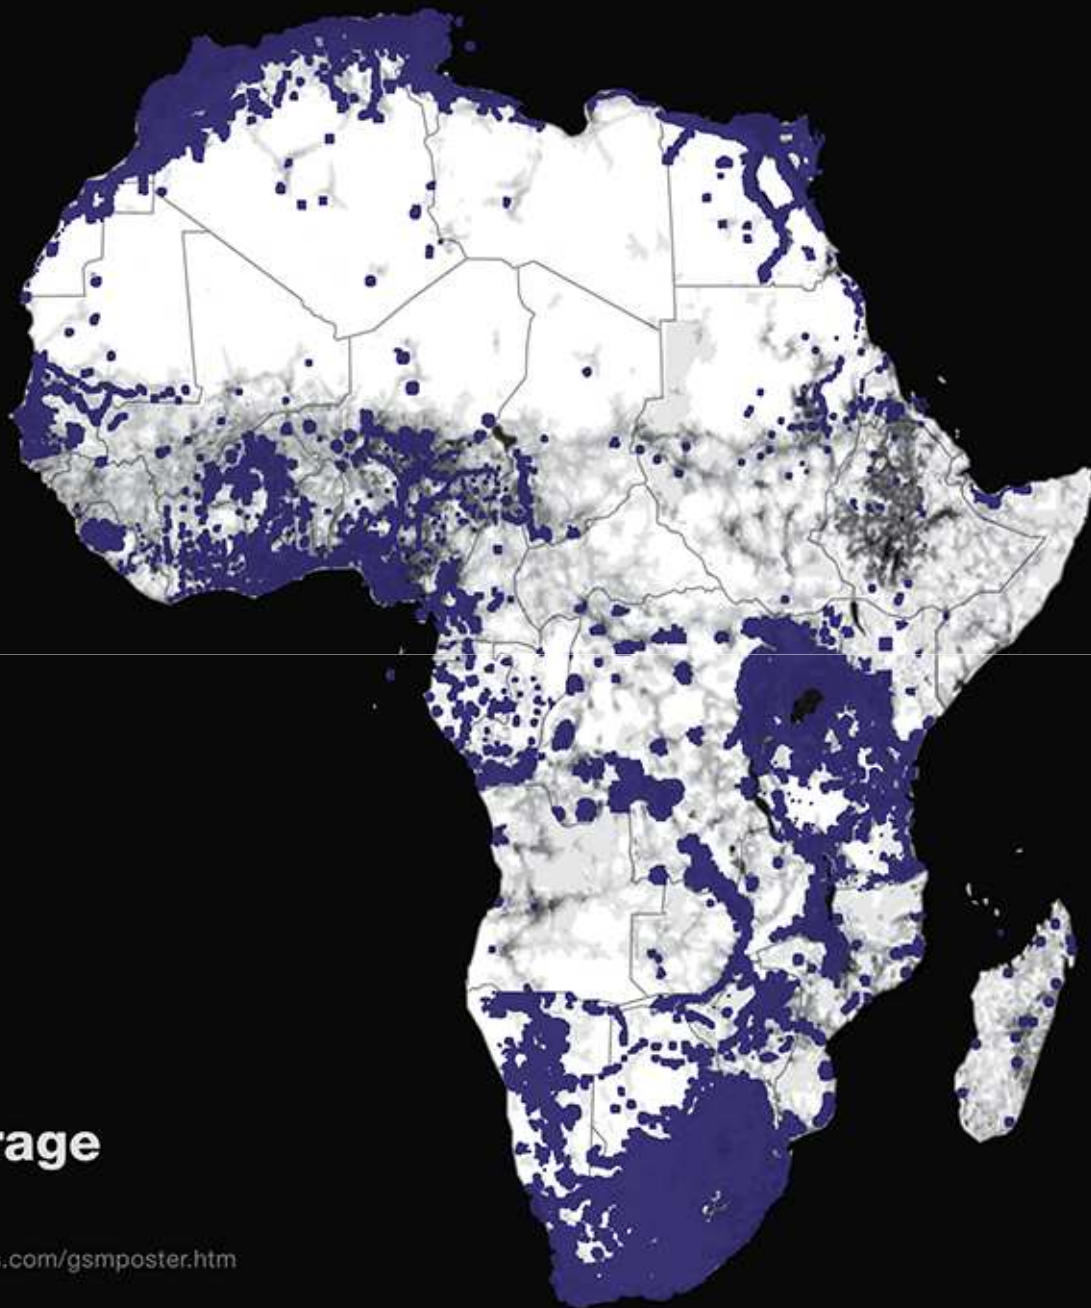

[http://na.unep.net/globalpop/africa/Appendix\\_6e.html](http://na.unep.net/globalpop/africa/Appendix_6e.html)

## Electricity Availability

● Strong Availability

<http://apod.nasa.gov/apod/ap081005.html>

## GSM Coverage

● Strong Coverage

<http://www.coveragemaps.com/gsmposter.htm>

The explosions of cell phones is leading to the explosion of innovation around phones...new types of business around phone use, phone sales and charging phones.

Kasana Phone

Solar Powered Phone

Village Phone

New Business Models

M-pesa

Mobile Money Transfer

# We Have a Platform:

- Cost/Access: Mobile phones & Shared Computers
- Connectivity: Mobile Data & Global Internet
- Power: Low-power devices & solar & batteries

# And Constraints:

- SMS is lowest-common-denominator UI
- Costs remain high & access is limited
- Limited technical “capacity”

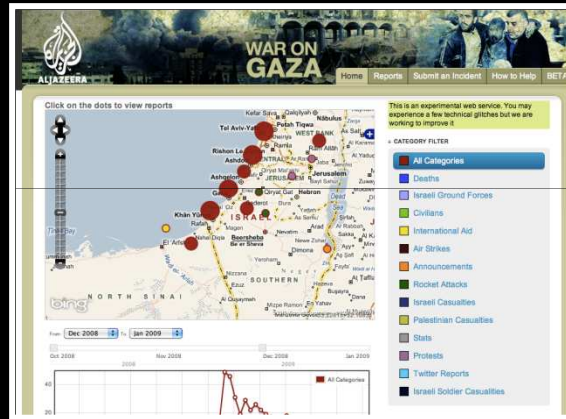

# ICT4D (New School)

## Software

- OpenMRS / Baobab
- Grameen MoTeCH
- MiFOS
- RapidSMS, ChildCount...
- RapidFTR

## Services

- TxtEagle
- Text To Change
- Google SMS
- Ushahidi
- Bhoomi

## Cost/Access

- \$10 Mobile
- UNICEF Digital Drum

Let's look at one of these projects in detail:

UNICEF RapidSMS Malnutrition  
Project in Malawi

**Malawi**

Malnutrition can be accurately measured with

Age

+

Height

Weight

Upper Arm  
Circumference

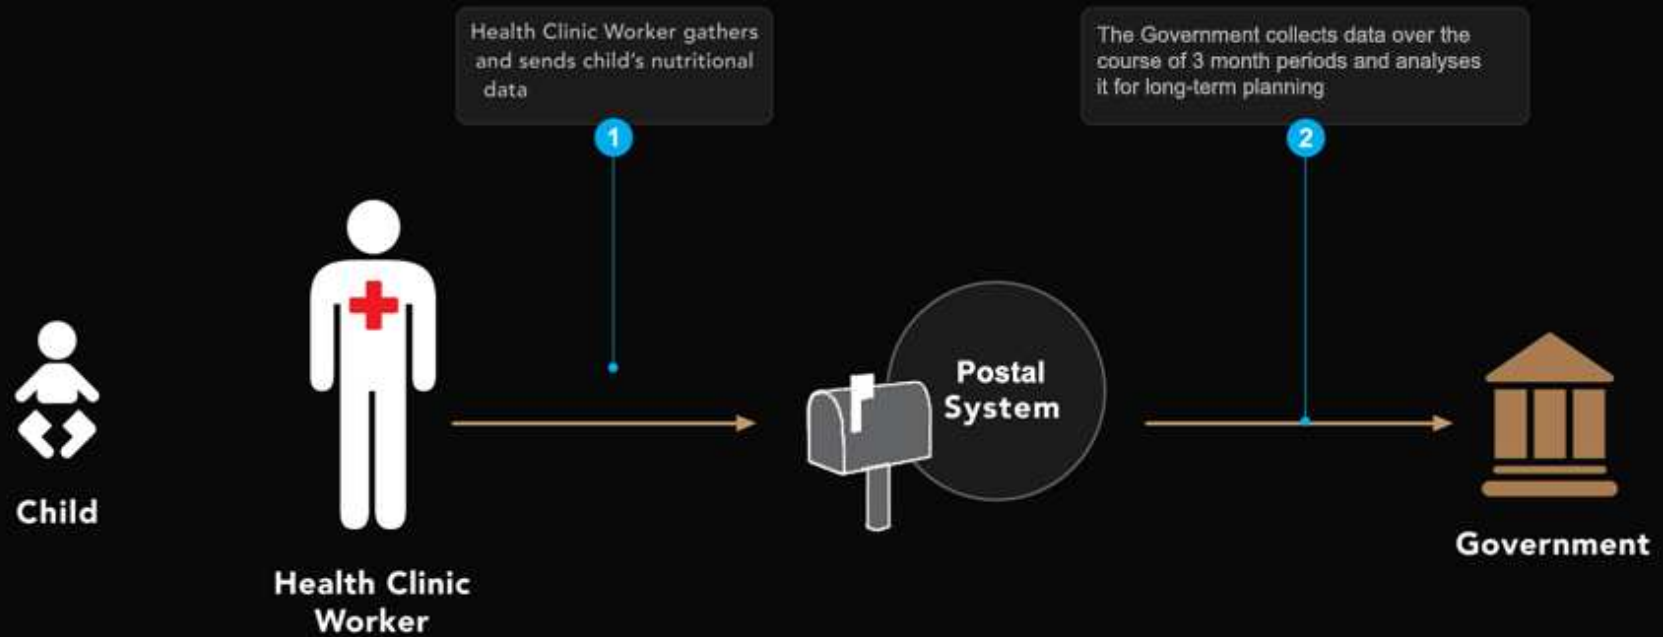

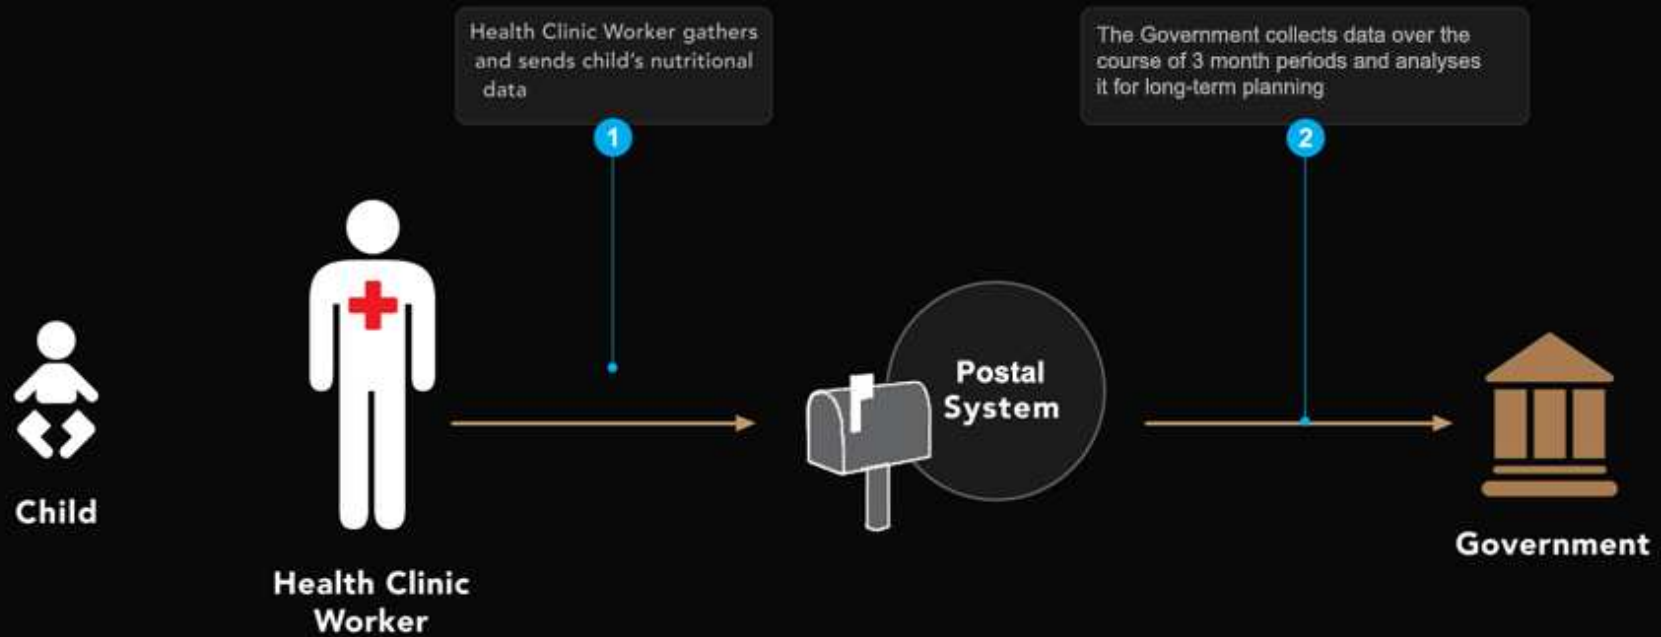

## Data Gathering in Malawi in 2008

## Data Gathering in Malawi in 2008

Child

Health Clinic Worker

Health Clinic Worker gathers and sends child's nutritional data to the central system

1

Central SMS System

The central system aggregates nutritional data and sends to UNICEF, Government, Development & Humanitarian partners

# RapidSMS Malawi 2009

**A Thank You message became our best insight.**

# RapidSMS Malawi 2009

# Costs low since health workers have cells

- Training
- Costs of SMS messages

Software made this possible. Specifically, an open-source framework called RapidSMS developed by UNICEF and many partners.

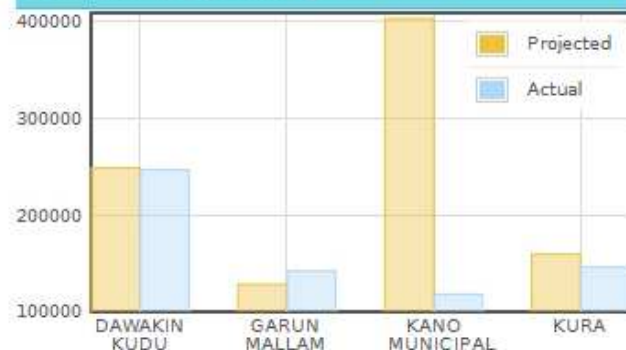

# RapidSMS is:

- Languages & Platform: Python, mySQL, & Linux
- Framework: Django
- Source Control: Git
- RapidSMS is more a set of libraries than an application
- Modular Architecture: Apps, Router, Backend

### Mobilization and Net Distribution Summaries

### Beneficiaries Summary

### Daily Distribution Progress

Date	Day	Reports		Net Cards		Beneficiaries	
04/05	1	61	31%	6828	1%	34659	3%
05/05	2	133	69%	34258	9%	137562	14%

# RapidSMS also is:

- A global community of hundreds of developers
- Built to solve real world problems that NGO's, UN agencies, and governments have

The more people involved and the more we use  
the frame work the more use-cases we  
discover for SMS.

Tracking  
Ready to Eat Foods  
In Ethiopia

Tracking  
Malarial Bednet  
Distribution in Nigeria

Creating Budgeting Tools  
for selling Cook-stoves  
In Ghana

Teaching Literacy  
Skills to Girls in  
Senegal

Let's look at one another project:

RapidFTR  
Project for Haiti

# RapidFTR

## (Family Tracing and Reunification)

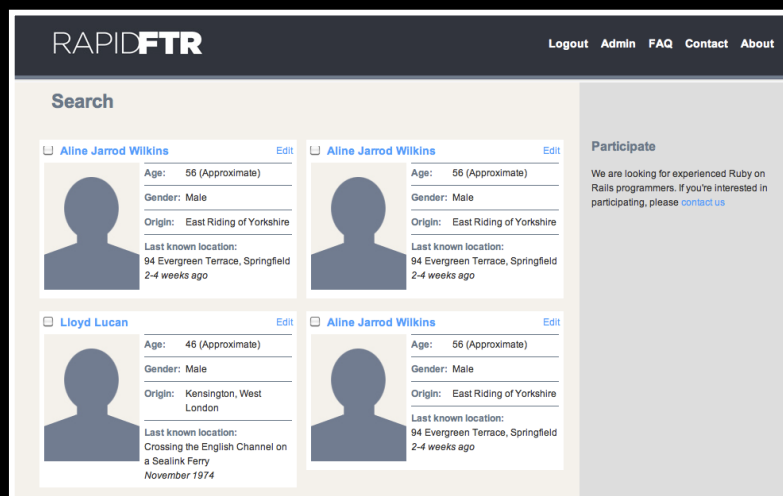

- Collaboration among NYU ITP, UNICEF and TW
- Based on designs from the ITP
- Work began after Haiti earthquake
- Use ICTs to improve family reunification efforts

# RapidFTR

## (What it Does)

- Secure datastore of located children
- Web client for identifying/locating children
- Mobile clients for data collection & search
- Rails, CouchDB, BlackBerry
- It isn't done: server-side, Symbian, Android etc..

# ICT4D Today

- Industry is solving basic infrastructure
- Platforms for software & services exist
- Access is improving
- Software matters *now*
- Exciting time for software developers
- Contribute to a project: RapidFTR, RapidSMS, OpenMRS

RAPID**FTR**

Rapid**SMS** 

 OpenMRS

**Questions?**

NO-ONE KNOWS WHETHER OR NOT  
HANNA HAS ANY FAMILY NOW.

ThoughtWorks®  
Tisch ITP

WE THOUGHT THERE  
SHOULD BE AN APP FOR THAT.

**COUNT ME IN**

ThoughtWorks is helping New York University's Interactive Telecommunications Program develop RapidFTR, a child-finder app that lets aid workers collect and share information about children in emergency situations, so they can be reunited with their families. The process, called Family Tracing and Reunification, is currently done on carbon paper.

RapidFTR is just one of the projects ThoughtWorks is involved in through our social engagement programme. We work with organisations who are using technology to solve pressing problems all over the world.

We will be holding code jam / project jam evenings in the coming weeks. We need your help with RapidFTR and other projects. It's a fun way to help save the world.

**Sign up, donate some time and make a difference. We'll be in touch with dates soon.**
