The Basketball Attic

Last updated: January 28, 2000

Welcome to the Basketball Attic, the hottest site on the web for basketball fanatics. The Basketball Attic has one goal...to provide visitors with a solid resource of knowledge about the great game of basketball. There will be articles on some of the best players to have ever played. Currently, I am featuring **Bob Pettit**. If you think you may have missed any players, you can view the **archives**. I will also be running articles on teams and contributors, such as **The King Charles Troupe**. And of course, I have information on the **birth of the NBA**, as well as information on the **origin of the game** itself, and a **current news** page. There are also several lists of **award winners** over the years. Please feel free to **email me** with any questions, suggestions, comments, or concerns.

This month's trivia question:

1) Which basketball playground legend was famous for his double-dunk?

Answer in history section

The background of the image is a warm, orange-hued sunset sky. In the foreground, the dark silhouette of a person is walking across a flat, open landscape. In the mid-ground, the iconic white marble domes and minarets of the Taj Mahal are silhouetted against the bright sky. The overall mood is serene and contemplative.

**114 million more men than
women have cellphones**

The background of the image shows the silhouette of a mosque with several domes and minarets against a bright orange and yellow sunset sky. In the foreground, there is a dark silhouette of a person walking across a flat, open landscape.

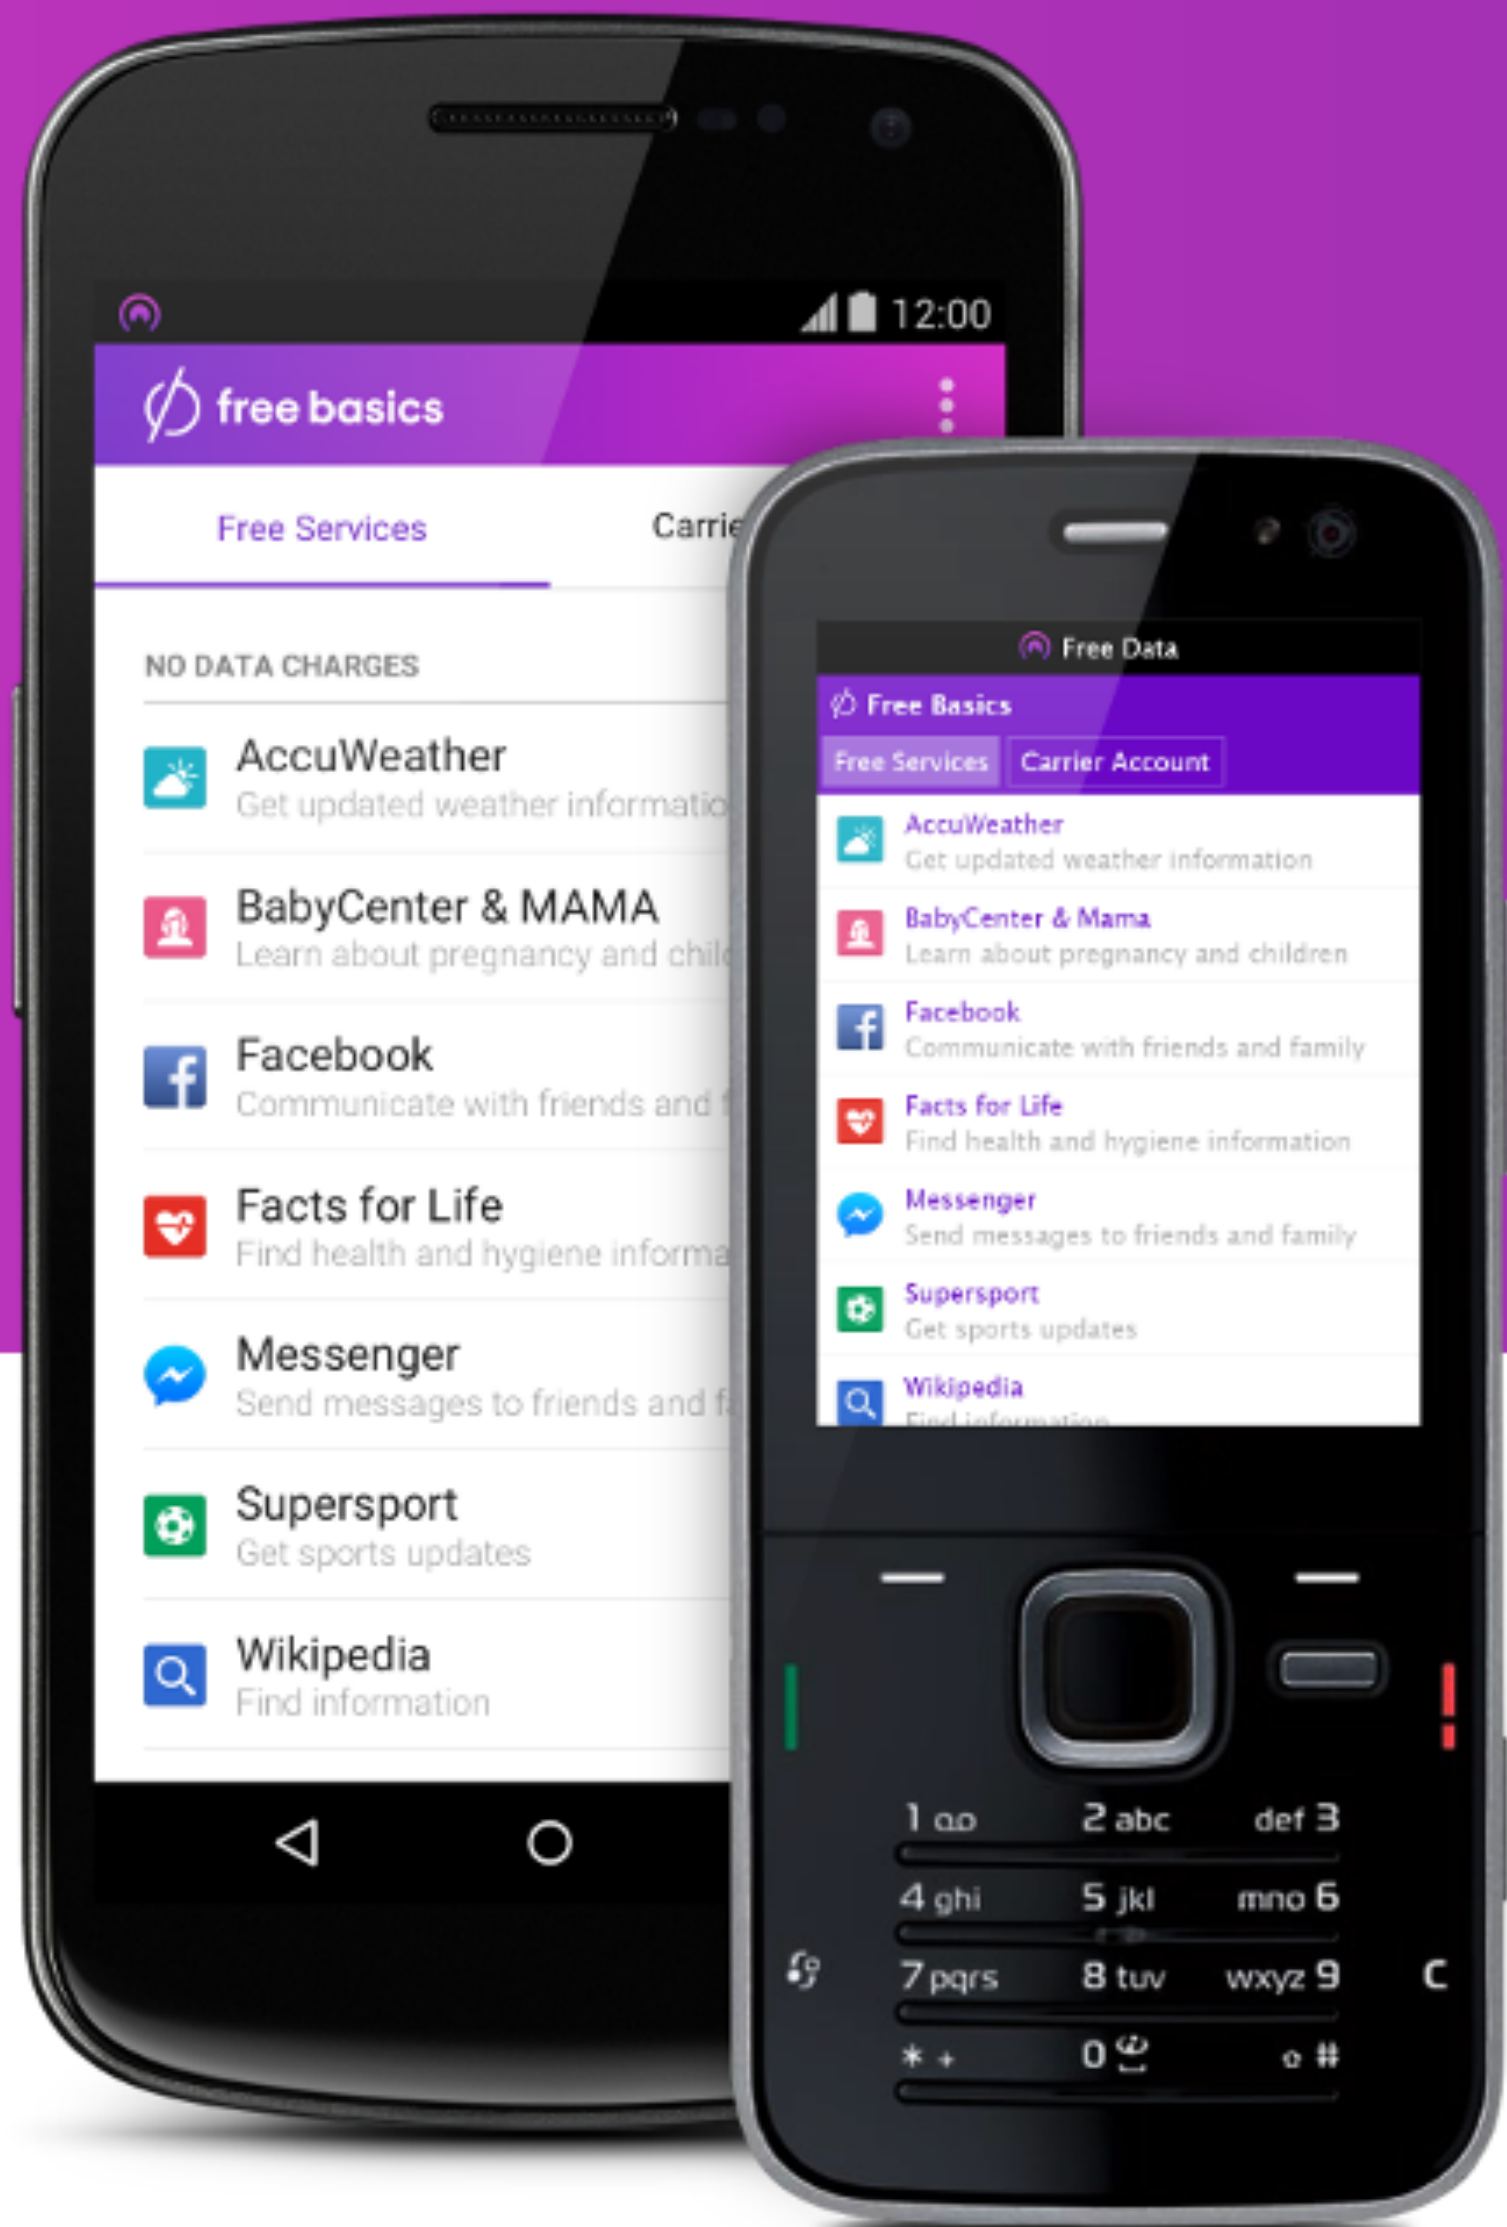

“Mobile phones are really dangerous for women...””

CONTENT

An aerial photograph of a vast, densely populated city skyline at dusk. The sky is a deep, dark blue, and the city lights are beginning to glow. The buildings are packed closely together, with a mix of modern skyscrapers and older, more uniform residential blocks. A large body of water is visible on the right side of the frame. Overlaid in the center of the image is the text "700 MILLION" in a large, bold, white, sans-serif font.

Wikipedia's Switch to HTTPS Has Successfully Fought Government Censorship

DANIEL OBERHAUS

May 26 2017, 9:26am

Image: Wikimedia Commons/Shutterstock - Remix by Jason Koebler

Harvard researchers found fewer instances of Wikipedia censorship after the site started encrypting all of its traffic.

"Knowledge is power," as the [old saying](#) goes, so it's no surprise that Wikipedia—one of the largest repositories of general knowledge ever created—is a frequent

[Blog](#) > *77% of sites use at least one vulnerable JavaScript library*

MARCH 29, 2017

77% of sites use at least one vulnerable JavaScript library

[Tim Kadlec](#)

[Subscribe to RSS feed](#)

The other week a paper was released that reported that about 37% of sites included at least one JavaScript library with a known vulnerability. When we [wrote about the findings](#), we mentioned that we thought that the reality was almost certainly worse.

It is. Much worse, in fact.

We ran our own test using the top 5,000 URLs from Alexa and discovered that a whopping 76.6% of them include at least one vulnerable library. If you're curious how we conducted the test, the details [are below](#) or feel free to skip [to the results](#).

The test

To run the tests, we grabbed the top 5,000 URLs from Alexa. We ended up with several URLs that errored when we tried to reach them, so we kept going further down the Alexa list until we ended up with 5,000 pages that all successfully loaded.

Each URL was run through [WebPageTest](#). WebPageTest loaded each page in Chrome, and

Blocked Access: Website Accessibility Lawsuits on the Rise

Eversheds Sutherland (US) LLP

EVERSHEDS
SUTHERLAND

USA | June 5 2017

Key Points:

- Lawsuits alleging violations of the ADA for websites inaccessible to the blind are on the rise—with approximately 250 filed in the last year.
- The ADA prohibits discrimination against the disabled in “places of public accommodation” including some websites.
- ADA lawsuits can be costly to businesses and guidance on ADA compliance is still years away.

An increasing number of class action lawsuits have been filed over the past year against private companies by individuals alleging violations of the Americans with Disabilities Act (ADA) for failure to maintain websites that are accessible to the blind and visually impaired. In 2016 alone, approximately 250 lawsuits were filed by a handful of plaintiffs' firms against companies in the retail, hospitality, and
