QCon LONDON by InfoQ

# Teams & Orgs at QCon London 2027

## Sessions

### Key Skills Upgrades Beyond Tech for Engineers Leaning Into AI-Native - Organizational Architecture and Choice Architecture for Coherence

Effective use of AI for value delivery needs clear organizational architecture: bounded scopes, traceability, ongoing stewardship from teams, trust via bounded agency, and platform abstractions that enable humans and AI to operate effectively.

**Matthew Skelton**

CEO & Principal @Conflux, Co-Author of "Team Topologies", Leader in Modern Organizational Dynamics for Fast Flow

---

### From Shipping Code to Shaping Products

When we move into Staff+ roles, our responsibilities extend beyond just writing code. We need to understand not just *how* to build something, but *what* we're building, *why* it matters, and *what happens after we ship it*.

**Trisha Gee**

Developer Champion and Author of "Head First Java" (3rd Ed), "97 Things Every Java Developer Should Know", and "Getting to Know IntelliJ IDEA"

---

### Coaching Skills for Staff+ Engineers

Staff+ engineers hold more together than their titles show. They listen to a team that is stuck. They get several teams to agree on one design. They hand a hard problem to the right team and let that team grow.

**Blanca Garcia Gil**

Transformational Coach and Principal Engineer, Founder, International Speaker, QCon London PC

**Dianing Yudono**

Career & Leadership Coach, Speaker, Software Engineer
